

INDUSTRIAL FLOORS AND PAVEMENTS

CONSTRUCTION (Rough-in)

MAINTENANCE AND FLOORS RECOVERY

More than 10 years in the construction industry. We are one of the largest contractors devoted to concrete pouring and levelling.

We provide a complete service for commercial and residential high-rise building projects, as well as for large distribution centers, shopping malls, educational complexes and hospitals, among others.

Our experience in placing thousands of m³ per year in vertical elements and slabs allows us to meet schedules, quality, and associated budgets efficiently and safely.

MORE THAN
500
PROJECTS
ENDORSE US

10 YEARS OF EXPERIENCE

RCH™ Construction Company, commercially RCH™, with more than 10 years of experience, is one of the largest contractors dedicated exclusively to the placement of concrete, and has a complete service for commercial and residential high-rise building projects, as well as for large distribution centers, shopping malls, and educational complexes and hospitals, among others.

Our experience in placing thousands of m³ per year in vertical elements and slabs allows us to meet schedules, quality, and associated budgets efficiently and safely.

+ THAN 500 PROJECTS DEVELOPED

+ THAN 220 HAPPY CUSTOMERS

+ THAN 1 MILLION OF M² DEVELOPED ACROSS THE COUNTRY

Currently, our main clients are companies in the construction, commercial, industrial and real estate sectors, both public and private, in the central, northern and southern areas of the country.

We constantly participate in public and private bids through *ChileCompra*, and we are a registered company in *ChileProveedores*.

We build concrete floors and facades, continually seeking to introduce cutting-edge technology, innovate, and improve practices to achieve the highest quality solutions in each of our projects.

COMPREHENSIVE SERVICE

In order to serve our clients and attend all of our projects efficiently, we have separated our services into three business lines:

INDUSTRIAL FLOORS AND PAVEMENTS

- Preparation and levelling of support (base and sub-base)
- Industrial floors and pavements
- Exterior floors
- Commercial floors
- Floor coating
- Washed concrete floors
- Epoxy floors
- TCP® Pavements
- Slabs, topping slabs, and steel decks
- Ramps
- Expansion and isolation cuts with Soff-Cut system (Recommended for low thickness or early maturing foundations)
- Expansion and insulation cuts with water cooling disc (Recommended for under-roof or thick foundations)
- Sealing of expansion joints, insulation and construction (Includes supply of materials and specialized labor).

CONSTRUCTION (ROUGH-IN)

- Placing and vibrating of concrete for two-sided walls (high-rise buildings full service)
- Placing and vibrating concrete for walls against the ground
- Placing and vibrating of concrete for double-height walls
- Placing and vibrating concrete for expansion works (full service)
- Placing and vibrating concrete for streets and sidewalks
- Placing and vibrating concrete for swimming pools
- Placing and vibrating concrete for ponds

MAINTENANCE AND FLOORS RECOVERY

- Application of dust sealer and wear protection for cellars
- Demarcations
- Scarifying and removal of pre-existing paints and/or membranes
- Repair of cracks and crevices
- Cutting, demolition, and removal of defective floors
- Dry polishing
- Renovation of joint seals
- Mortar and self-levelling application
- Floor washing and cleaning services

Learn more about our services and capabilities, as well as the industries we serve, where we turn your challenges into ours.
